

NISHA SHRESTHA

Senior QA Engineer · SDET · Test Automation & CI/CD

Toronto, ON (GTA), Canada · (416) 722-8393 · nishashrestha5470@gmail.com

[linkedin.com/in/nisha-shrestha](https://www.linkedin.com/in/nisha-shrestha) · github.com/Nisha8393

PROFESSIONAL SUMMARY

ISTQB-certified Senior QA Engineer with 7+ years building automation-first quality practices from the ground up across enterprise SaaS, US healthcare (claims and payment logic), and e-commerce. Currently own quality end to end for a three-application SaaS platform, building the Playwright UI and Postman/Newman API regression suites from zero and integrating them into Jenkins and GitHub Actions CI/CD alongside Product, Engineering, and DevOps. Hands-on across Playwright (TS/JS), Selenium (Python), API, and performance testing, with recent experience validating AI/LLM-driven features, mentoring QA engineers, and driving quality standards in Agile teams.

TECHNICAL SKILLS

Test Automation: Playwright Test (TypeScript / JavaScript), Selenium WebDriver (Python, Pytest), hybrid framework design, Page Object Model, custom fixtures, data-driven / parameterized tests

API & Performance: REST API testing, Postman, Newman, Playwright APIRequestContext, Apache JMeter (load, throughput, response-time validation)

CI/CD & Version Control: Jenkins, GitHub Actions, Git, automated pipeline integration, parallel execution, build stability gating

Languages & Data: TypeScript, JavaScript, Python, SQL / MySQL (business-rule and data-accuracy validation)

AI / GenAI: QA of AI recommendation & matching systems; Claude Code, GitHub Copilot, MCP servers for test generation and diagnostics

Test Types: Functional, Regression, Smoke, Integration, End-to-End, API, UAT, Performance, Cross-Browser

Process & Tools: JIRA, TestRail, Confluence, Agile / Scrum, test strategy, release criteria, defect triage, QA mentoring

Certifications: ISTQB Foundation Level (ASTQB) · Selenium WebDriver 4 · Postman REST API Testing · Scrum Fundamentals

PROFESSIONAL EXPERIENCE

Software QA Lead | OpenScreen Inc., Toronto, ON

Mar 2025 – Present

Playwright Test · TypeScript · Postman / Newman · Apache JMeter · Jenkins · GitHub Actions · REST APIs · SQL · Claude Code / MCP

- **Architected a hybrid Playwright Test (TypeScript) framework as the only QA engineer**, using the Page Object Model, custom fixtures, and parameterized tests to cut regression on a QR-based asset-tracking SaaS platform from days to hours.
- **Extended API coverage into Playwright using APIRequestContext** so UI and API assertions run from a single suite with shared authentication state.
- **Own and continuously expand the Postman/Newman API regression suite** covering authentication, role-based permissions, workflow execution, asset lifecycle, and reporting across all three applications.
- **Integrated all suites into Jenkins and GitHub Actions pipelines** so every merge produces a quality signal, managing credentials, network access, and build-stability thresholds.
- **Reduced post-release defect escapes and shortened resolution cycles** by partnering with Product and Engineering on triage and fix validation, and gating releases on defined quality criteria.
- **Ran load and performance testing in Apache JMeter** to validate scalability, throughput, and response times before enterprise onboarding.
- **Applied GenAI tooling and MCP servers** to generate test scripts, test data, and defect diagnostics, increasing coverage output per sprint.
- **Established the company's first QA documentation standards** covering test strategy, defect reporting, and release-validation checklists, giving stakeholders clear release readiness.

QA Analyst | Profound Impact Corporation, Toronto, ON

Aug 2024 – Mar 2025

Selenium WebDriver · Python · Pytest · Postman · MySQL · REST APIs · JIRA · Agile / Scrum

- **Built Selenium WebDriver** (Python + Pytest) automation for an AI-driven grant-matching platform, covering ~60% of the regression suite and sharply cutting execution time.
- **Reduced post-release defects 25%** through earlier, broader test coverage and a formalized defect lifecycle.
- **Evaluated AI matching output** against manager-defined metrics for relevance, correctness, and ranking, flagging false positives to improve recommendation reliability.
- **Performed API testing with Postman**, validating responses against MySQL to improve data accuracy across the matching pipeline.
- **Stood up QA documentation, test repositories, and defect standards** from the ground up, improving testability and risk coverage across Agile ceremonies.

QA Engineer | Cedar Gate Technologies, Greenwich, CT, USA (Remote)

Feb 2022 – May 2023

[SQL](#) · [EDI 837 / 835](#) · [XPath](#) · [In-house web automation platform](#) · [JIRA](#) · [TestRail](#) · [Agile / Scrum](#)

- **Ensured regulatory compliance across insurance workflows and EDI (837/835) processing**, validating claims-calculation and payment accuracy against complex business rules using SQL.
- **Automated 65% of the smoke suite** using an internal browser-based automation platform with XPath-based element location.
- **Mentored junior QA engineers** and led team test execution in the team leader's absence, keeping delivery and quality on track.
- **Authored test requirements** from business rules and system architecture, feeding risk assessment and release planning.

QA Analyst | Daraz Kaymu Pvt. Ltd., Nepal

Jan 2020 – Feb 2022

[ERP & e-commerce platforms](#) · [SQL](#) · [UAT](#) · [Regression & E2E testing](#) · [JIRA](#)

- **Performed UAT, regression, and end-to-end testing** across 6+ ERP and e-commerce platforms in a high-transaction marketplace environment.
- **Improved end-user acceptance through structured validation and defect resolution**, partnering with cross-functional teams to refine requirements and improve user experience.

Business Analyst / QA | Web Creation Nepal, Nepal

Jan 2018 – Dec 2019

[UAT](#) · [Requirements & impact analysis](#) · [Test documentation](#) · [Stakeholder collaboration](#)

- **Performed UAT, impact analysis, and scope validation**, reducing scope creep and aligning delivery with stakeholder goals.

OPEN SOURCE PROJECTS

- [Automation-Exercise](#) End-to-end UI automation suite (JavaScript) covering registration, product search, cart, and checkout flows on automationexercise.com.
- [Automation-ExerciseAPI](#) API test suite validating status codes, response payloads, and error handling across the same platform's endpoints.
- [selenium-python-framework](#) Selenium WebDriver framework in Python / Pytest: Page Object Model structure, reusable driver and configuration setup, and data-driven test cases.

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science & Information Technology | Tribhuvan University, Nepal | Distinction, GPA 3.8

2017

- ISTQB Foundation Level Certified Tester (ASTQB), Feb 2025
- Selenium WebDriver 4 with Python (Udemy), Apr 2024
- Postman REST API Testing (Udemy), Sept 2024
- Scrum Fundamentals Certified (SCRUMstudy), Mar 2024
